Email: coxrl@ornl.gov

Richard Cox is a member of the Modeling and Simulation Group in the Computational Sciences and Engineering Division at ORNL. Major projects have included research and development associated with fuel reprocessing for the Liquid Metal Fast Breeder Reactor (LMFBR) program, engineering analysis and computer codes for the Gas Centrifuge Enrichment Program (GCEP), and development of computer codes related to the application of DRIFT (diffuse reflectance infrared Fourier transform) spectroscopy at the Y-12 National Security Complex.

He has a B.S., M.S., and Ph.D. in chemical engineering from the University of Tennessee at Knoxville.
